PRODUCT CATALOGUE

## pu•la•rys [pul'aris]

*NOUN*

1.«an old Polish term for a wallet, originating mainly in the south of the country»; 2.«comes from the Latin word *pugillares* (tablets for writing down, for example, accounts)»; 3.«a kind of small pocket folder with compartments for notes, documents, etc.; a wallet»

# HELLO. I'M YOUR **NEW WALLET.**

---

There are some objects that give us satisfaction and make us stand out. What we surround ourselves with influences who we are, it is the image of our personality and our second skin.

We are here to provide you with items that you'll love to own! Almost 100 years of experience make us what we are - we have been producing leather goods since the 1930s, continuing the family tradition, which is manifested by our proudly used, former name of the wallet - PULARYS.

Modern production methods allow us to achieve maximum effect with minimum materials use. The result is a product freed from excess, beautiful in its simplicity and yet fulfilling its function. The PULARYS wallet is small, but surprisingly spacious - it does not overwhelm with its presence, it does not take up space in a briefcase, handbag or pocket. It is at your fingertips - always functional. Thanks to RFID-blocking technology, which protects against unauthorised scanning of cards, it uncompromisingly safeguards sensitive data and your money.

We are driven by a passion for creating elegant, practical and innovative products - we simply know what's good. And so do our customers!

# 90 YEARS OF EXPERIENCE

We started out as a small family business, specialising in leather harnesses for horses in the 1930s. Such products were in high demand at the time, as horses were omnipresent and widely owned for transport and labour purposes. The experience and craftsmanship that our ancestors gained and passed on to future generations over the decades of their work resulted in the company's steady growth and evolution into what it is today. With almost a century of experience, we now know everything there is to know about leather.

In the early 90s we decided to focus on producing leather wallets. The idea of producing high-quality wallets for everyday use, to accompany people everywhere, was and remains a very enjoyable and motivating prospect. For us, quality is defined by craftsmanship and materials with soul.

# MADE IN EUROPE

PULARYS wallets are crafted from genuine top-grade natural leather, combining modern aesthetics with optimal functionality, and high quality. They provide all the features you need for your daily life, such as quick access to cards, cash, and coins. They are stitched using the highest quality sewing machines and polyester thread that is highly resistant to abrasion and ageing. The leathers we use meet all the REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) requirements and the environmental and health standards of the European Union.

Each wallet is crafted with great attention to detail using traditional techniques such as waxing and burnishing, as well as advanced technologies, including computerised stitching. This ensures that each wallet has a unique, modern look and the qualities and features that guarantee its longevity.

Hand-crafted products are of an incomparable quality to mass-produced items. A machine will never be able to evaluate subtle features such as the aesthetics of a wallet, nor will it ever be able to replace the judgement of the human eye and hand. Therefore, drawing on our skills and ideas in our heads, we have developed our own technology and procedures for producing PULARYS wallets. Every item we offer is manufactured exclusively by our craftswomen and craftsmen in the PULARYS production hall. We believe in taking personal care of every single step of the production process.

By choosing PULARYS wallets you can be sure that you're choosing European, tradition-based products made of the highest quality materials.

## SMART SOLUTIONS

The PULARYS minimalist wallet helps you stay organised, safe, and stylish anywhere you go. It features RFID-blocking technology, to help protect your credit and debit cards, as well as your ID from identity theft and electronic pickpocketing. The finished leather product is durable and looks great, giving you an extra touch of class and sophistication. Its card slots and aluminium case make organising your cards easy, while the slim design ensures your pockets won't bulge.

The mechanism of gradual card ejection has been designed to hold payment cards securely, even after prolonged use. Initially, the cards may feel gripped too tightly, but the mechanism will naturally adjust to them within a few weeks. **This was a deliberate design decision on our part.** This helps us to avoid a common problem on the market, where mechanisms that work smoothly at first become too loose over time, causing the cards to fall out. Safety always comes first.

Although our PULARYS wallets containing the "pul" mechanism are compact, we offer many surprisingly spacious models that provide their owners with both banknote compartments and even coin pockets.

We care a great deal about the uniqueness of the concept, which comes first. It's our policy to stand out from countless imitations.

During the production process, we don't just rely on careful human hands. Thanks to our team of designers, we can create outstanding designs from scratch that meet our customers' needs and expectations.

It is very important to us to maintain a creative and bold approach to the design process. We're constantly looking for innovative ways to solve problems and overcome challenges, and we often come up with solutions that differ from those already on the market. These smart solutions and our use of materials have become our trademarks, and we are very proud of them. Consequently, the majority of our PULARYS designs are registered and copyright protected.

At PULARYS, we provide our customers with exclusive, premium-quality wallets with a flawless finish that cannot be found anywhere else.

# MATERIALS

## NOMAD LEATHER

Nomad leather, also known as a long-lived one, is a full-grain pull-up leather of the highest quality. It is vegetable-tanned, which means it is produced using a traditional, slow method involving tannins derived from tree bark, leaves and other plant parts. Thanks to the oiling process, the wallet's appearance changes over time. The folds lighten and it scratches easily, creating a natural vintage look. However, the original appearance can be restored by polishing.

## THE ORIGINAL LEGENDARY VINTAGE SADDLE LEATHER

The Original Legendary Vintage Saddle Leather is a material that has been used for centuries in the manufacture of high-end saddles. It is tanned using vegetable substances and gains its water-repellent properties from the use of hot wax, which, by penetrating its structure, protects the leather from water while retaining its elasticity. Over time and with use, the leather's appearance changes - it gets scratched, its colour changes in the folds, and it develops a noble, natural patina. Additionally, the leather becomes more supple and durable the longer it is used. The Original Legendary Vintage Saddle Leather is prized for its raw beauty, durability and versatility. This is why it is used not only for saddles, but also for a whole range of other leather products.

## SAFFIANO LEATHER

Saffiano leather is a type of full-grain leather that is traditionally tanned using natural vegetable tannins. Its surface is covered with a thin layer of paint, which gives it an even colour, and varnish, which increases its resistance to dirt and scratches. The characteristic texture is created by the embossed, finely checkered Saffiano pattern, which was **designed by Mario Prada in 1913**. The result is a timelessly elegant leather.

## ITALIA LEATHER

Italia leather is a modern half-matte-finish leather, which is available in a wide range of vibrant colours. The surface of the leather has been sprayed with a colour anilin dye. Thanks to this the natural growth marks and the structure of the leather are preserved and still visible on the finished product. This is a unique feature of our natural, full-grain leather. Being a semi-veg tanned leather, **Italia leather is exceptionally soft** and pleasant to the touch, yet strong and durable. In addition, the leather has been covered with a water-repellent varnish, which makes it dirt-resistant.

## WASH PAPER

Wash Paper is a modern, eco-friendly material that is widely used in the world of fashion and design (commonly used, for example, as a label on the back of jeans). It is a blend of cellulose and silicone, with a **leather-like appearance and exceptional durability**. Wash Paper does not dissolve on contact with water and is **water-resistant**, which makes it ideal for demanding conditions.

## REGALIA LEATHER

Regalia leather is a full grain natural leather. Its character is achieved by transferring metallic colour onto it from a special transfer film. Regalia is dirt-resistant and soft and smooth to the touch. Shiny and futuristic, it catches the eye both in daylight and in the glow of club neon lights.

## HUNTER LEATHER

Hunter leather is high-quality pull-up leather, commonly known as nubuck. Its surface has been polished, soaked in a special oil, and finally coated with a wax that allows the wallet to age beautifully, which creates a **natural worn-out and second-hand look**.

# VARIANTS

The basic versions of our wallets are equipped with compartments that can hold several payment cards, documents, and banknotes. Some of them are available in enhanced versions - with additional features or eye-catching designs.

## Go

**Go** is an additional inner pocket for coins or other flat essentials such as keys or memory cards. It closes with a flap. The pocket is flat and discreet; a few coins inside will not cause the wallet to bulge.

## Max

**Max** is an additional external coin pocket with a snap fastening. Thanks to its accordion design, the pocket is really spacious - it can hold a lot of change or other small items you want to keep with you at all times.

## Decor

The **Decor** option is an aesthetically pleasing decoration available on some wallets and ZEN credit card holders. The natural leather is decorated by debossing or stitching and the credit card holders are decorated with laser engraving. Such a unique, customised wallet makes a great gift idea. Or a special gadget just for yourself.

## For AirTag

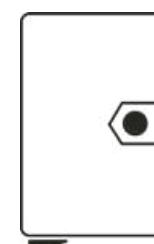

The **For AirTag** option is an additional external pocket designed to perfectly fit an AirTag-type locator, which is secured by the strong snap fastening. With this feature, you will never lose sight of your wallet.

## CREATE YOUR OWN ZENBox!

The PULARYS ZENBox is a customisable cardboard box display containing 20 PULARYS ZEN CREDIT CARD HOLDERS.

The displays and aluminium credit card holders we offer can be designed with the artwork of your choice, e.g. referring to your business, service, sports team, travel destination or location. Our production processes allow individual design and customisation based on your wishes.

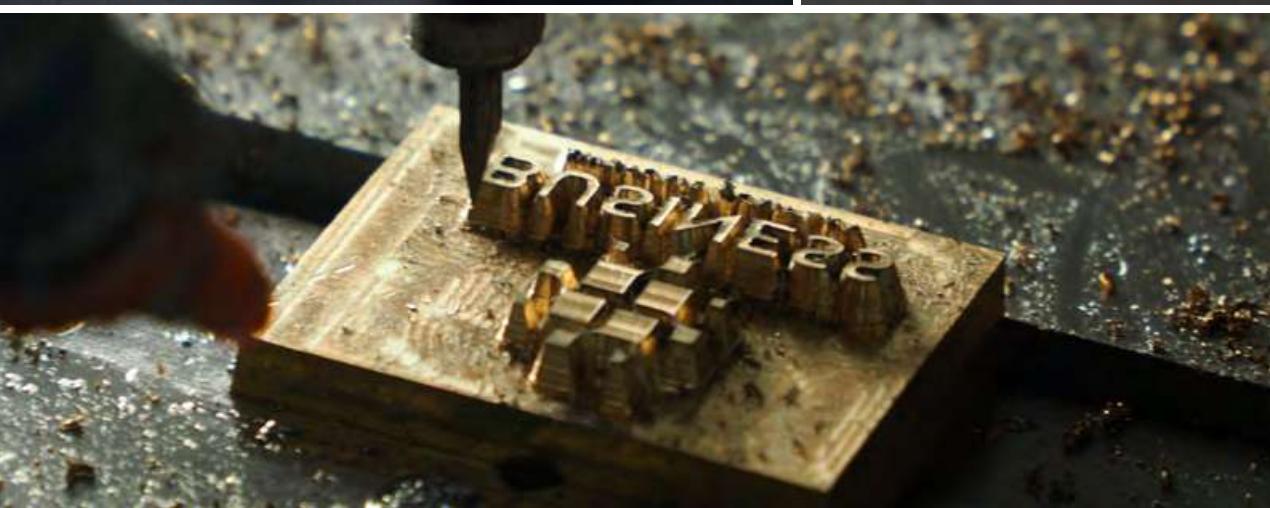

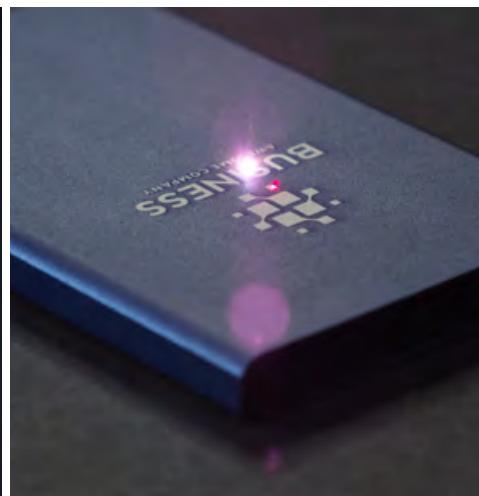

The customised displays and card holders let your customers connect with your service on a unique level combining a high-quality product with their personal experience, allowing them to keep their memories with them everywhere they go. In our opinion, the ZENBox is especially suitable for concept stores and souvenir retailers.
